

Assisted Living / Independent Living Alert System

No Monthly Fees - No Phone Line Needed - No Cellular Service Needed

Uses Your Wi-Fi - Smartphone Notifications

This Assisted Living / Independent Living Alert System is great for the facility that wants a quiet way to be alerted when a resident has an emergency or needs assistance. This system allows residents of an Assisted Living / Independent Living Facility to feel safe and secure knowing that help is just a button push away. Send alerts to any or many Smartphones. No phone line needed!

HOW IT WORKS:

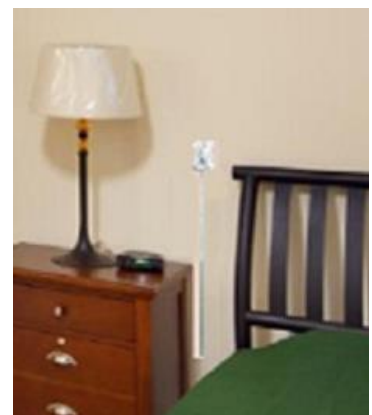

Assisted Living /Independent Mounted Pull String and Assisted Living /Independent Living Wearable Alert Button all have built in Wi-Fi.

Download the Smartphone app and pair units to the Smartphone app.

When the Wearable Alert Button or Mounted Pull String is pulled they will send a silent alert to an app on any or many Smartphones.

The nurse or assistant on duty will know who has pressed the button and will be able to respond immediately.

Typically, a resident would carry the Wearable Alert Button. When the Alert Button is pressed a staff member in or around the facility will receive a notification alert on their Smartphone that the button has been pressed. The notification would have an identifier such as the name or room number of the resident to identify who pressed the button. The best configuration of this systems consists of 3 Alert Buttons for each resident. One button would be the Wearable Alert Button the resident would carry with them all around the facility. The second button would be a Mounted Pull String Alert button placed in the bathroom. The third button would be a Mounted Pull String Alert button placed within reach of the bed.
